Why this is important

What can a phishing email look like?

A few months back, we detected a phishing email that was being used by an external bad actor on some of our employees.

Thankfully, it failed due to being an **obvious fake**. However, we know that phishing emails are now getting very sophisticated and a range of tactics are used.

Start the quick quiz to learn what an 'obvious fake' might look like.

Back Start your quiz

Task 1: Design a phishing email simulation

What is the first issue you spot in this phishing email?

From: mastercardsIT@gmail.com
To: employee@email.com
Subject: URGENT! Password Reset Required
—
Body:
Hello (insert name) ,

Your email account has been compromised. immediate action is required to reset your password!

Click here to reset your password in the next hour or your account will be locked:
https://en.wikipedia.org/wiki/Phishing

Regards,
Mastercard IT

- The email looks legitimate
- Suspicious looking source email address
- The subject line says URGENT!

Great Work!

Correct! First of all, there is a typo in the email address. You can also see that it is coming from gmail, not a Mastercard email.

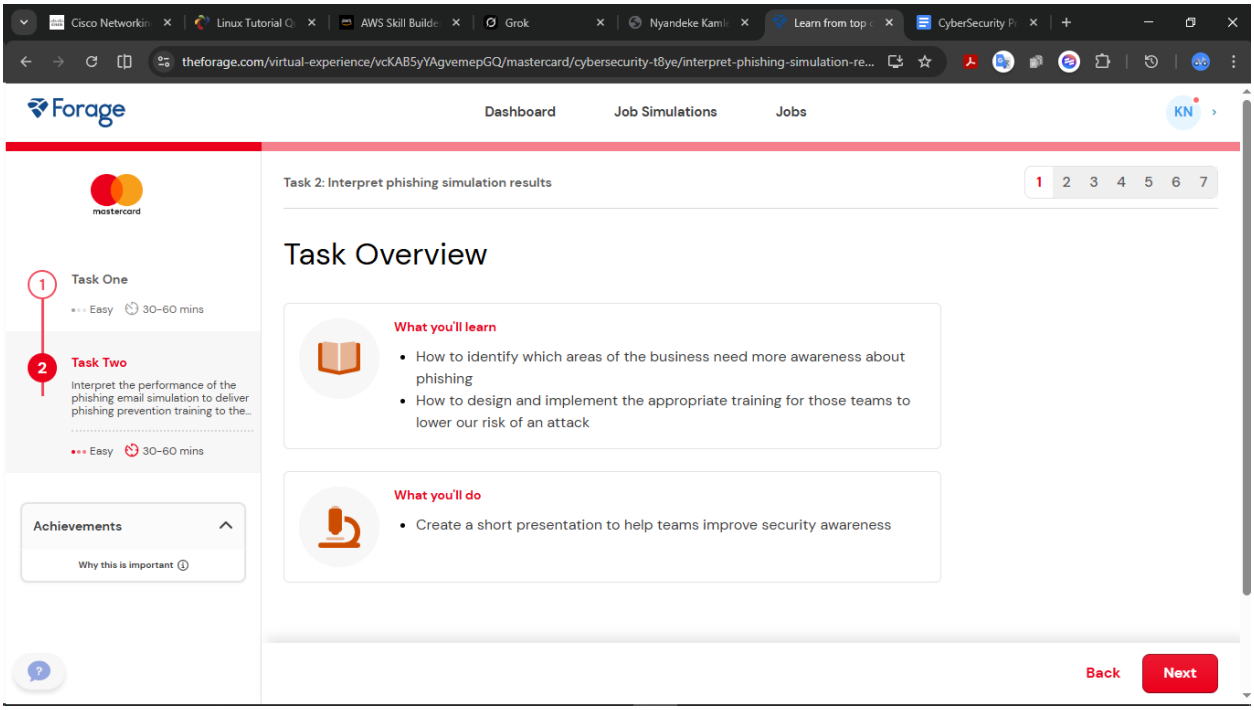
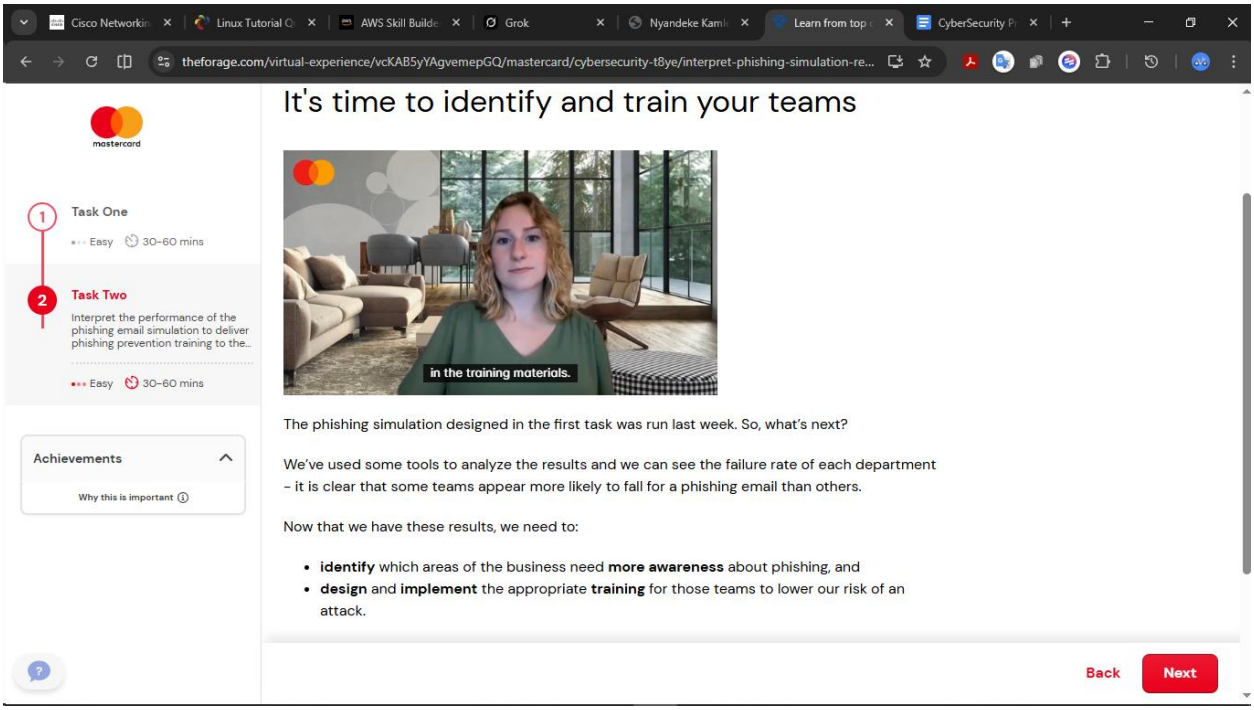
Task 2 - Interpret phishing simulations results





Interpret the results

First, let's have a look at the results of the phishing campaign.

This table helps you to identify which teams appear to be **more likely** to fall for a phishing email than others.

Team	Email open rate	Email click-through rate	Phishing success rate
IT	80%	2%	0%
HR	100%	85%	75%
Card Services	60%	50%	10%
Reception	40%	10%	0%
Engineering	70%	4%	1%
Marketing	65%	40%	38%
R&D	50%	5%	2%
Overall average	**66%**	**28%**	**18%**

When you're ready, start the quick quiz to see if you've correctly identified the most vulnerable

Back Start your quiz

Card Services	60%	50%	10%
Reception	40%	10%	0%
Engineering	70%	4%	1%
Marketing	65%	40%	38%
R&D	50%	5%	2%
Overall average	**66%**	**28%**	**18%**

When you're ready, start the quick quiz to see if you've correctly identified the most vulnerable teams.

Here are some resources to help you

The percentages shown are based off the total number of staff members who **received** the email.

For example if 100 people received the email and 50 people opened it - the email open rate would be 50%.

- **Email open rate** = the percentage of people that opened it
- **Email click-through rate** = the percentage of people that clicked on the link
- **Phishing success rate** = the percentage of people that clicked the link and inputted some personal information

Back Start your quiz

Task 2: Interpret phishing simulation results

1 2 3 4 5 6 7

Question 1 of 1

Which teams performed poorly in the phishing simulation?

Team	Email open rate	Email click-through rate	Phishing success rate
IT	80%	2%	0%
HR	100%	85%	75%
Card Services	60%	50%	10%
Reception	40%	10%	0%
Engineering	70%	4%	1%
Marketing	65%	40%	38%
R&D	50%	5%	2%
Overall average	**66%**	**28%**	**18%**

- ○ Marketing and Card Services teams
- ○ IT and Reception teams
- ◉ HR and Marketing teams
- ○ HR and Engineering teams

Great Work!

Correct! The HR and Marketing teams performed poorly in the simulation and should receive further training.

Back Next

Task 2: Interpret phishing simulation results

1 2 3 4 5 6 7

Create a short presentation

Now that you've analyzed the results, it's time to create a short presentation (3-5 slides) providing some awareness and training materials for the two teams that appear to be most susceptible. This will help us improve the security awareness of the teams that performed poorly in this campaign.

To help prepare your presentation slides, you can use the template provided below:

Phishing presentation template

You can use this template to create your 3-5 slide presentation
